

MALUS  
AMORA Tree bench  
Mounting instructions

**01.**

Place the 4 leg structures on the grating according to the positions shown in the drawing.

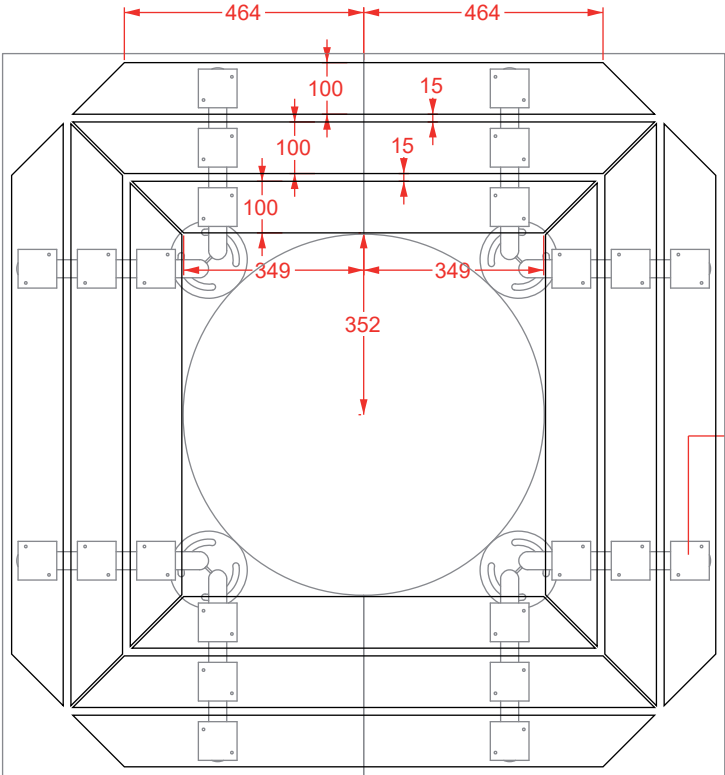

It's important to position the legs so that the seat horizontal supports (where the wooden planks will be attached) are parallel to each other.

**02.**

Fasten the leg structures to the grating with M10 bolts, nuts and washers.  
Use at least 2 bolts per leg.

 Mounting instructions

03.

Place the wooden seat planks, as shown in the drawing. Note the distance 15mm between the planks.

It's important the bench planks are centered in relation to the grating.

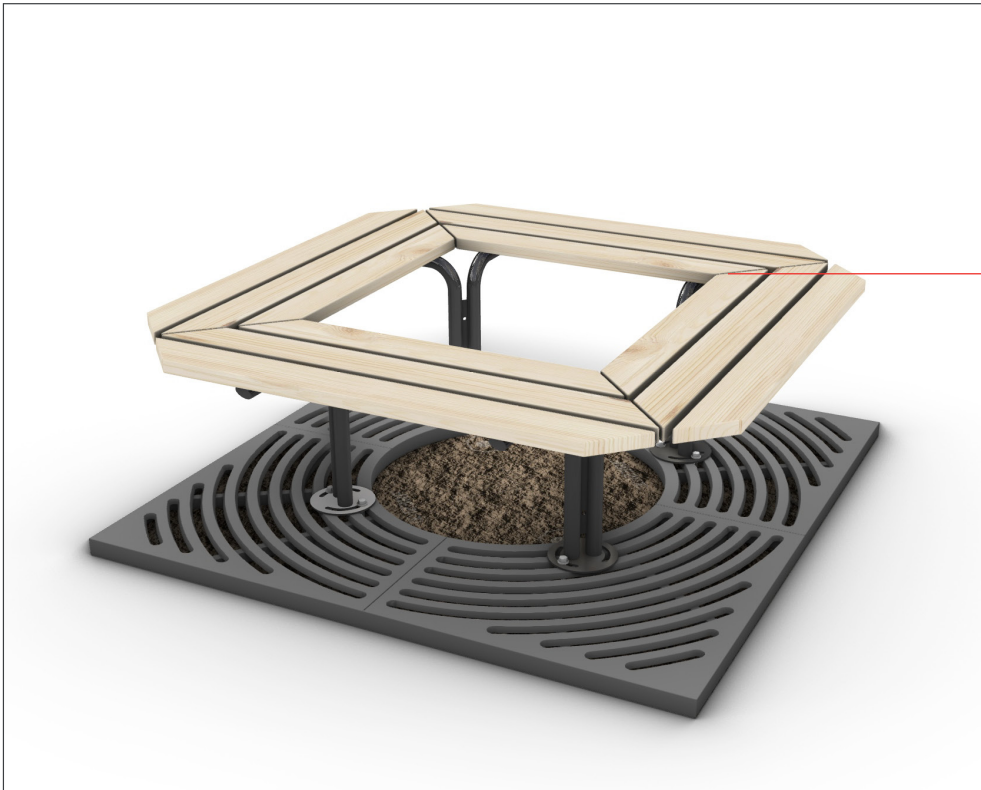

Note that the flat metal connection plates are in the center of the width of every plank.

03.

Starting with one bench, place the planks around the tree.

Mounting instructions

**03.**

The seat planks should be positioned as shown here.

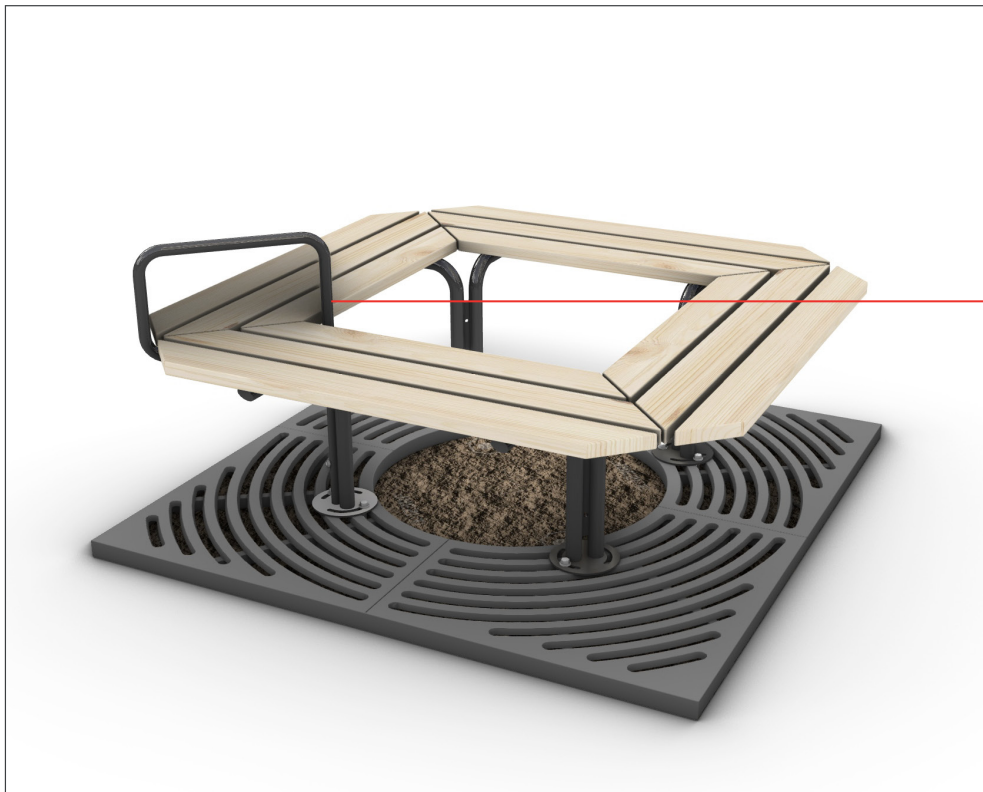

There is a small 5mm diagonal gap between the planks in the corners.

**04.**

Keeping the placement of the seat planks attach them to the leg structures with the wood screws.

Mounting instructions

05.

When mounting armrests, position them after the installation of the wooden benches, as shown.

06.

Connect to the leg structure with M8 bolts, nuts and washers.

Make sure the armrest is at 45 degrees in relation to the bench and attach with wooden screws to the underside.
